Tata Power Renewable Energy to develop 12 MWp solar project for Tata Motors

Our Bureau
New Delhi

Tata Power Renewable Energy (TPREL) on Tuesday said that it has entered into a Power Purchase Agreement (PPA) to develop a 12MWp on-site solar project at Tata Motors' Pune commercial vehicle manufacturing facility.

A significant step to-

wards attaining green manufacturing, the installation is collectively expected to generate 17.5 million units (MU) of electricity every year, which will meet nearly 17.2 per cent of the annualised requirement. This will potentially mitigate over 12,400 tonnes per kWh of carbon emission each year, TPREL, a Tata Power subsidiary, said.

The solar project is to be

commissioned within six months after the PPA gets signed and will be a significant contributor to Tata Motors' long-term ambitions, it added.

The PPA will include rooftop installations. This 12MWp adds to existing 8.73 MWp summing to 20.73 MWp for Tata Motors across CVBU (Commercial vehicle) Pune.

Over the next few years,

the company plans to expand the solar capacity of its Pune plant to meet the growing demand for renewable energy, TPREL said.

TPREL and Tata Motors have previously collaborated to develop a 16 MWp solar power project at Pantnagar in Uttarakhand, which is slated to be the largest in terms of capacity in the state.

The article text begins with: 'In a significant stride towards green manufacturing, Tata Motors (BO: TAMO) (NYSE: TTM) and Tata Power Renewable Energy Limited (TPREL), a subsidiary of Tata Power, have entered into a Power Purchase Agreement (PPA) to develop a new 12MWp on-site solar project at Tata Motors' Pune commercial vehicle manufacturing facility. The announcement was made on Wednesday. This new initiative is expected to generate 17.5 million units of electricity annually, fulfilling nearly 17.2% of the annualized requirement and potentially offsetting over 12400 tonnes/kWh of carbon emissions each year. The solar project will be commissioned within six months after the PPA gets signed, and will include rooftop installations. The additional 12MWp bolsters the existing 8.73 MWp, bringing the total solar power capacity at Tata Motors across Commercial vehicle Business Unit (CVBU), Pune to 20.73 MWp. Over the coming years, the company has plans to further augment the solar capacity of its Pune plant in response to increasing renewable energy demand.'
